Personal letter

I found your job ad on LinkedIn and got interested.

I possess a broad knowledge within, amongst other techniques, PHP, Java SE and HTML/CSS. Other competences I have can be found initially on my Curriculum Vitae.

I have worked as a developer on a professional lever earlier, but not in recent time. I have been studying and also developing privately though. In my Curriculum Vitae you can find links to some of my work samples available for review. There you can see that I possess the skills and experience needed to perform a good job.

I'm a fast learner, and I'm not afraid of challenges and am open to prove my skills and strength.

Good service and quality is important to me, therefore I have a great commitment, are positive and courteous in my work.

It will be very exciting and developing to work with you.

With kind regards,
Stefan Elmgren
